

ANSHU VISHWAKARMA

Full Stack Developer

anshuv.dev@gmail.com | +91 96532 49071 | Mumbai, Maharashtra | [linkedin.com/in/anshu147](#) | [github.com/Anshu147](#)

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 1+ year of experience building scalable MERN stack applications, AI- powered solutions, and automation systems. Specialized in developing production-ready SaaS platforms with RAG-based AI chatbots, real-time communication systems, and workflow automation. Proven track record of delivering end-to-end solutions that improve operational efficiency and user engagement.

EXPERIENCE

- Qorex, Full Stack Developer**01/2025 – Present | Mumbai, Maharashtra
- Developed and deployed full-stack SaaS applications using React.js, Node.js, Express.js, and MongoDB, serving production users at <https://chatbot.qorex.in>.
 - Built an AI-powered chatbot builder platform using RAG (Retrieval-Augmented Generation) with LangChain.js, Groq (Llama 3), HuggingFace embeddings, and Pinecone vector database for document-based question answering.
 - Architected RESTful APIs with JWT authentication, role-based access control, and implemented real-time chat using Socket.io with streaming AI responses.
 - Integrated document processing pipelines supporting PDF, DOCX, and TXT files with automated text extraction, chunking, and vector embedding generation.
 - Automated business workflows using n8n with webhook integrations, API orchestration, and event-driven automation, reducing manual operations by 40%.
 - Designed analytics dashboards with conversation tracking, performance metrics, and data visualization for business insights.
 - Optimized MongoDB and Pinecone database schemas for high-performance semantic search and real-time data retrieval.
 - Collaborated in agile environment using Git, GitHub, and Postman for version control, code reviews, and comprehensive API testing.

EDUCATION

Bachelor of Science in Information Technology,2021 – 2024

KESSC College, University of Mumbai, Maharashtra

CGPA: 9.1 / 10.0

SKILLS

Frontend Development React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Redux Toolkit, Framer Motion, Recharts, Axios	Backend Development Node.js, Express.js, REST APIs, Socket.io, JWT Authentication, Webhooks, Multer, Express Validator	Databases MongoDB, MySQL, Redis, Pinecone (Vector DB)	AI & Automation RAG Implementation, LangChain.js, Groq AI (Llama 3), Hugging Face Embeddings, Vector Search, AI Chatbot Integration, Prompt Engineering, n8n Workflow Automation, Webhooks
Tools & Practices Git, GitHub, Postman, VS Code, Docker, Agile Development, REST API Design, Real-time Systems

PROJECTS

- AI-Powered Chatbot Builder SaaS,** <https://chatbot.qorex.in>
React.js, Node.js, Express.js, MongoDB, Socket.io, Groq (Llama 3), LangChain.js, Pinecone, Hugging Face, Tailwind CSS
 - Built a production-ready SaaS platform enabling businesses to create AI chatbots trained on their documents.
 - Implemented RAG pipeline with document processing, text chunking, and semantic search using Pinecone and embeddings.
 - Developed real-time chat system with Socket.io  for streaming AI responses with context awareness.
 - Designed analytics dashboard for conversation insights, performance tracking, and user behavior analysis
- Scalable Job Portal Platform,** <https://job-portal-rho-wine.vercel.app/>
React.js, Next.js, Node.js, Express.js, MongoDB, Redis, JWT, Cloudinary, Tailwind CSS, Autocannon
 - Built full-stack job portal with candidate job search/application features and recruiter job posting/ management dashboard.
 - Designed RESTful APIs with Node.js and Express supporting job search, filtering, company management, and application tracking.
 - Implemented JWT-based authentication with role-based authorization for separate candidate and recruiter workflows.
 - Integrated Cloudinary for resume uploads and prevented duplicate applications using compound MongoDB indexes.
 - Enhanced performance with Redis caching for frequent queries and MongoDB indexing, reducing database load significantly.
 - Conducted load testing with Autocannon, validating scalability to handle 1000+ concurrent users per minute.
- Learning Management System (LMS),** *React.js, Node.js, Express.js, MongoDB, Context API*
 - Developed comprehensive LMS with user authentication, course enrollment, shopping cart, payment integration, and admin panel.
 - Built RESTful APIs for course management, user progress tracking, reviews, and secure payment processing.
 - Implemented admin dashboard for content management, user analytics, and course performance monitoring.
